Subject: High Profile Product - Xue "Identification of vulnerable communities with high blood lead levels in Michigan"

Good Day Bruce,

For Advanced Notification review (or awareness), attached is the poster material for Jim Xue's upcoming ISES presentation in Ottawa. The presentation focused on identifying vulnerable communities with high blood lead levels in Michigan. It is a first deliverable of a larger ORD research activity (SHC 2.63.6) to help identify locations and key factors for informing effective Pb risk reduction, prevention, and mitigation efforts. Also, attached is the Factsheet in the new format.

Title: Identification of vulnerable communities with high blood lead levels in Michigan

Potential Implications:

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Let me know if you have questions.

Thanks, Annette.
